Artist's Statement

In this body of work I enjoyed exploring different types of still life. Starting with my continual fascination with light, I found inspiration looking at windowsills and objects in that context; observing the way the light interacts with these objects as well as the scenes through the window. This led to my appreciation for the way light interacts with water and glass, the way the light refracts and gives the scene tension.

After participating in several group shows themed around food, I decided to continue exploring the realm of food. I found the process revealed the psychology and symbology of food in various contexts.

Windows
